Warning: This game can give you cancer faster than smoking does. You would need to invent new words to decribe how bad this is.. This might be the worst\u2665\u2665\u2665\u2665\u2665\u2665i've ever seen. -276,175,226\/10. Don't play it. If you've ever played breakout this is it but worse. Also when you change languages on the title screen the whole title screen changes and not in a good way. The English UI looks like it was thrown together in 1.666 microseconds. The Russian title screen is acceptable.. This is genuinely one of the worst games I have ever played in my life.
